MINOR IN LEADERSHIP STUDIES

The Minor in Leadership Studies is designed to provide students with in-depth knowledge of leadership theory, skills, and experience through a rigorous and multi-disciplinary program of study.

The minor is comprised of three tracks - Business, Global Engineering Leadership, and Public Policy, offered through the Institute for Leadership & Entrepreneurship at the Scheller College of Business, the College of Civil and Environmental Engineering, and the School of Public Policy at the Ivan Allen College of Liberal Arts.

Students in the Minor are expected to complete an experiential exercise of leadership in either a professional internship (Global Engineering Leadership or Public Policy tracks), or in a project-based setting (Business track) with non-profit, corporate, governmental, social enterprise, or hybrid organizations. This unique experience allows students to apply their leadership skills to build capacity and create value for a partnering organization; particularly in circumstances where resources are limited.

Students make connections within the community and around the world, while developing their leadership competencies and gaining familiarity with new sectors and concepts.

Eligibility
You need to have 30 completed hours at Georgia Tech and a cumulative GPA of at least 2.5

Completion Requirements
Business: 15 credits
Public Policy: 15 credits
Global Engineering Leadership: 18 credits
Core Course: PUBP 4140 Foundations of Leadership

Hear It From Fellow Students

“The leadership skills I learned through the Minor have helped me here and will help me in my future endeavors.” - Biomedical Engineering Student

“The courses I took with the Minor were some of the most valuable I had during my undergraduate career.” - Environmental Engineering Student
